

**AIAPGET 2024**  
**HOMOEOPATHY QUESTIONS**  
**WITH ANSWER KEY**

*Homeopathy* **360**  
*You think, We Link...*

---

Q1. Arrange the following signs and symptoms, in increasing order of their appearance in pregnancy, starting from first to last

- (A) Quickening
- (B) Palmer's sign
- (C) Hegar's sign
- (D) Lightening

Choose the correct answer from the options given below :

- (1) B,A,D,C
- (2) C,D,B,A
- (3) C,B, A,D
- (4) B,G,A,D**

Q2. For the bad effects of abortions and miscarriages. Sensation of soreness and heaviness in pelvis; a consciousness of a womb, feels it move when she moves, it is so sore and tender

Choose the correct options :

- (1) Murex
- (2) Lyssin
- (3) Lappa
- (4) Helonias Dioica**

Q3. Which of the following statement is/are true regarding manifestation of Psoric Miasm?

- (A) Aggravated in morning and from eating meat.
- (B) Ameliorated by cold.
- (C) Always hungry with burnt taste of mouth
- (D) Stupid, dull senses and especially stubborn.

Choose the correct answer from the options given below :

- (1) B andD
- (2) A, Band C
- (3) B and c

(4) A and C

Q4. Which of the following rubrics are given in generalities section of Kents Repertory?

- (A) Bed sores
- (B) Thrombosis
- (C) Apoplexy
- (D) Constipation amel
- (E) Diarrhoea in aged people

Choose the correct answer from the options given below :

(1) A, B, C only

(2) B, C, D only

(3) C, D, E only

(4) D, E, A only

Q5. Clinical Repertory by Clarke was published in the year :

(1) 1904

(2) 1924

(C) 1908

(4) 1939

Q6. The general quality or capability of the living organism of receiving impressions and the power to react to stimuli is known as

(1) Enantiopathy

(2) Mongrel sect

(3) Susceptibility

(4) Venesection

Q7. Given below are two statements :

Statement I : "Vandemataram Scheme" is a voluntary scheme where any obstetric and gynaecology specialist, maternity home, nursing home, lady doctor/MBBS doctor can volunteer themselves for providing safe motherhood services.

Statement II: 'ASHA incentive of Rs. 200 in urban areas include Rs. 100 for ANC component and Rs. 100 for accompanying pregnant woman for institutional delivery.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both Statement I and Statement II are true
- (2) Both Statement I and Statement II are false
- (3) Statement I is true but Statement II is false**
- (4) Statement I is false but Statement II is true

Q8. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A): According to Kent's 5<sup>th</sup> observation, The amelioration comes first and the aggravation comes afterwards.

Reasons (R) : The inference of Kent's 5<sup>th</sup> observation is that the remedy is superficial and could only act as palliative.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are true but (R) is NOT the correct explanation of (A)**
- (3) (A) is true but (R) is false
- (4) (A) is false but (R) is true

Q9. Recurrent episodes of macroscopic hematuria during or immediately following an upper respiratory infection is a feature of:

- (1) Lupus nephritis
- (2) IgA Nephropathy**
- (3) Minimal change disease
- (4) Focal segmental glomerulosclerosis

Q10. Ependymal cells are the cells :

- 1) that secrete cerebrospinal fluid**
- 2) that secrete and maintain myelin in the peripheral nervous system
- 3) whose foot processes form the blood brain barrier
- 4) that remove bacteria and damaged tissue in the central nervous system

Q11. Match List I with List II:

- | List I              | List II          |
|---------------------|------------------|
| A. Skeletal muscle  | (i) Lipoma       |
| B. Smooth muscle    | (ii) Teratoma    |
| C. Totipotent cells | (iii) Leiomyoma  |
| D. Adipose tissue   | (iv) Rhabdomyoma |

Choose the correct answer from the options given below :

- 1) (A)-(IV), (B)-(iii), C-(ii), D- (i)
- 2) (A)-(iii), (B)-iV, C-ii, D- (i)
- 3) (A)-(ii), (B)-iii , C- i, D-iv
- 4) (A)-(IV), (B)-(ii), C-iii, D-i

Q12. Given below are two statements :

Statement I : Law of similar is the fundamental law in the palliation of incurable states.

Statement II: Kent's ninth observation states that prolonged aggravation and final decline of patient demands palliative treatment.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both Statement I and Statement II are correct
- (2) Both Statement I and Statement II are incorrect
- (3) Statement I is correct but Statement II is incorrect
- (4) Statement I is incorrect but Statement II is correct

Q13. Given below are two statements with respect to clinical features of mesenteric cysts

Statement I : Mesenteric Cysts occur most commonly in children.

Statement II: The most common presentation is a painful abdominal swelling near the umbilicus.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both Statement I and Statement II are true
- (2) Both Statement I and Statement II are false
- (3) Statement I is true but Statement II is false
- (4) Statement I is false but Statement II is true

Q14. Which of the following are true?

- A. The sites of olfactory transduction are the olfactory hairs
- B. The olfactory bulbs transmit impulses to the temporal lobe of the cerebral cortex
- C. The axons of olfactory receptors pass through the olfactory foramina in the cribriform plate of ethmoid bone

D. The olfactory nerves are bundles of axons that terminate in the olfactory tracts

Within the olfactory bulbs the first order neurones synapses with the second order neurones

Choose the correct answer from the options given below :

- 1) (A), (B) and (D)
- 2) (B), (C), (D) and (E)
- 3) (A), (B), (C), (D) and (E)
- 4) (A), (C) and (E)

Q.15 One sided disease are :

- (A) Disease which affect one side of the body
- (B) Disease which belong to class of Acute individual disease
- (C) Disease with few perceptible symptoms
- (D) Less amenable to cure

Choose the most appropriate answer from the options given below :

- (1) A and C only
- (2) B and C only
- (3) C and D only
- (4) A and D only

Q16. Arrange the pressure sore frequency in descending order.

- (A) Heel
- B) Greater trochanter
- (C) Malleolus (lateral then medial)
- (D) Ischium
- (E) Sacrum

Choose the correct answer from the options given below :

- (1) CDEAB
- (2) D, B, E, A, C
- 3) E, B, C, D, A

(4) E, D,B,C, A

Q17. Great sensitiveness to open air, putting the hand from under the bed cover brings on cough is a keynote of

(1) Pulsatilla

(2) Psorinum

(3) Rhus tox

(4) Camphor

Q18. Given below are two statements :

Statement I —: First edition of Organon was published at Koethen.

Statement II: Hahnemann's articles on 'Aesculapius in balance' and "The Medical Observer" are regarded as precursor of First edition of Organon.

In the light of the above statements, choose the most appropriate answer from the options given below :

(1) Both Statement I and Statement II are true

(2) Both Statement I and Statement II are false

(3) Statement I is true but Statement II is false

(4) Statement I is false but Statement II is true

Q19. Extreme sensitivity to smell of cooking oil is an example of

(1) Surrogate

(2) Idiosyncrasy

(3) Moral remedy

(4) Lucid Interval

Q20. In Boenninghausen's Therapeutic Pocket book, rubric 'Death Apparent' is given in which chapter?

(1) Sensations

(2) Aggravation

(3) Chest

(4) Fever

Q21. Remedies for erratic pains are

- (A) KALI BICH
- (B) SULPHUR
- (C) PULSATILLA
- (D) LAC CANINUM
- (E) NUX VOMICA

Choose the correct answer from the options given below:

- (1) A, B, C Only
- (2) A, C, D Only
- (3) A, D, E Only
- (4) B, C, E Only

Q22. Which of the following is the most common inherited haemolytic anaemia caused by red cell membrane defect?

- (1) Hereditary Elliptocytosis
- (2) Hereditary Spherocytosis
- (3) Hereditary Stomatocytosis
- (4) Hereditary Pyropoikliocytosis

Q23. Match List | with List II : Rubric and Chapter of Kent's Repertory

List | List II

- | (Rubric)                   | (Chapter in Kent's Repertory) |
|----------------------------|-------------------------------|
| (A) Wen behind ear         | (I) Skin                      |
| (B) Abscess, Parotid gland | (II) Ear                      |
| (C) Hair, tangles easily   | (III) Face                    |
| (D) Hair, the unusual on   | (IV) Head                     |

Match List | with List II : Rubric and Chapter of Kent's Repertory

List | List II

(Rubric) (Chapter in Kent's Repertory)

- (A) Wen behind ear (I) Skin

(B) Abscess, Parotid gland (i) Ear

(C) Hair, tangles easily (II) Face

(D) Hair, unusual parts on (IV) Head

Choose the correct answer from the options given below :

1) A-III, B-II, C- IV, D-I

2) A III, B II, C I, D IV

3) A II, B III, C I, D IV

4) A II, B III, C IV, D I

Q24. According to Dr. Kent the patient of this drug is hard to study and the remedy itself is a hard one to study. The patient is whimsical, irascible, irritable, to the very highest degree, quarrels with his family and with his bread and butter. He is never at peace, is full of imaginations and fear. The remedy is :

(1) Kali carbonicum

(2) Lycopodium clavatum

(3) Opium

(4) Nux Vomica

Q25. The certificate of renewal to manufacture for sale or for distribution of Homoeopathic medicines is issued under

(1) Form 24-C

(2) Form 20-E

(3) Form 25-C

(4) Form 26-C

Q26. Consider the following statements about their correctness about the diagnosis and treatment of the acute scrotum:

(A) Torsion of the testis must be assumed until proven otherwise

(B) Testicular torsion can present with chronic inguinal or abdominal pain

(c) Torsion of a testicular appendage usually occurs just before puberty

(D) An incarcerated inguinal hernia must be considered in the differential diagnosis

(E) If torsion is confirmed, an orchidopexy should not be performed on both sides

Choose the correct answer from the options given below :

(1) A, B and C only

(2) B and E only

(3) A, C and D only

(4) A, B, C, D only

Q27. An old man complaining of chronic diarrhoea and shortness of breath on going upstairs reported in OPD. On examination, his tongue is clean, red and wet with central furrows with bloody saliva and multiple ulcers on soft palate. The most suitable remedy is :

- (1) Arum triphyllum                      (2) Fluoric acid  
(3) Nitric acid                              (4) Silicea

Q28. A patient was sitting up in bed, unable to lie down, as she was worse from lying down; face purplish and puffed, her eyes engorged, eyelids bloated, sat perfectly still with pain in the head as a surging sensation which came up the back of neck and head and then over the head. What is the probable remedy?

- (1) Opium                                      (2) Ars. album  
(3) Spigelia                                  (4) Lachesis

Q29. Which of the following does NOT belong to the class of chronic diseases?

- (1) One sided diseases                  (2) Indisposition  
(3) Alternating diseases                (4) Mental and emotional diseases

Q30. Glucose and Fructose are fermented into ethyl alcohol under the influence of :

- (1) Maltase                                  (2) Invertase  
(3) Zymase                                  (4) Sulphuric Acid

Q31. "Adapted to persons with dark hair and rigid fibre; weakly, psoric with excessively yellow, sallow complexion; subject to affections of respiratory and urinary tracts" is the symptom of:

- (1) Lycopodium                            (2) Arsenicum album  
(3) Causticum                              (4) Sulphur

Q32. In "Lathyrism" the toxin present in the lathyrus seeds has been identified as :

- (1) Beta oxalyl amino alanine (BOAA)                  (2) Terbutaline

(3) Chlorine

(4) Iodine

Q33. The Rubric 'Excitement, Emotional' is mentioned in which section of Therapeutic Pocket Book?

(1) Mind

(2) Sensations

(3) Aggravations

(4) Intellect

Q34. Match List I with List II:

List I

List II

(A) Tall thin irritable persons suffering from abuse of mercury

(1) Alumina

(B) Old people, weak vision, corpulent, tired of life

(II) Selenium

(C) Adapted to light complexion blondes, great emaciation of face, hands, legs and feet or single parts

(III) Aurum met

(D) "The Aconite of chronic diseases"

(IV) Arg. met

Choose the correct answer from the options given below :

(1) (A)-(III), (B)-II, (C)-IV, (D)-I

(2) (A)-(IV), (B)-(III), (C)- II, (D)-I

(3) (A)-IV, (B)-II, (C) I, (D)-IV

(4) (A)-(II), (B)-IV, (C) III, (D)-I

Q35. Given below are two statements with respect to the diagnosis of Mycetoma.

Statement I : Mycetoma usually presents early as it is very painful.

Statement II: MRI shows typical 'dot-in-circle' sign.

In the light of the above statements, choose the correct answer from the options given below:

(1) Both Statement I and Statement II are true

(2) Both Statement I and Statement II are false

(3) Statement I is true but Statement II is false

(4) Statement I is false but Statement II is true

Q36. Which of the following mind rubric is found in Boenninghausen's characteristics and Repertory but not found in Kent's Repertory?

(1) Alcoholism

(2) Abusive

(3) Abstraction of mind

(4) Affectation

Q37. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Statement I : Hypoparathyroidism presents as neuromuscular irritability and neuropsychiatric manifestations. Chvostek's sign and Trousseau's sign are found in hypocalcemia.

Statement II : Chvostek's sign (gentle tapping over the trigeminal nerve causes twitching of the ipsilateral facial muscles) and Trousseau's sign (inflation of the sphygmomanometer cuff above systolic pressure for 5 minutes induces tetanic spasm of the fingers and wrist). In the light of the above statements, choose the most appropriate answer from the options given below :

(1) Both Statement I and Statement II are correct

(2) Both Statement I and Statement II are incorrect

(3) Statement I is correct but Statement II is incorrect

(4) Statement I is incorrect but Statement II is correct

Q38. Match List I with List II:

List I

List II

(Nosodes)

(Source)

(A) Proteus

(I) Cancer of trees

(B) Pyrogenum

(II) Bowel nodes

(C) Nectrianinum

(III) Disease product of Human beings

(D) Diphtherinum

(IV) Decomposition of meat of beef

---

Choose the correct answer from the options given below :

(1) A-I, B-III, C- IV, D-II

**(2) A- II, B-IV, C- I, D- III**

(3) A- I, B- IV, C II, D- III

(4) A-II , B- I, C-III, D IV

Q39. All the statements about healthy articular cartilage are correct except:

(1) It is devoid of nerves

(2) 'It is a hyaline cartilage

(3) It is not visible on X-ray

**(4) It is vascular**

Q40. In many of the developing countries, the most common cause of deaths among women of reproductive age is :

(1) Pulmonary Tuberculosis

(2) Accidents

**(3) Maternal (puerperal) mortality**

(4) AIDS

Q41.

Match List I with List II :

List I	List II
DRUGS	SEASON FOR COLLECTION
(A) Chamomilla	(I) Second year growth
(B) Euphrasia	(II) Beginning of flowering
(C) Chelidonium	(III) When in flower
(D) Belladonna	(IV) Before flowering

Choose the correct answer from the options given below :

- (1) (A)-(I), (B)-(III), (C)-(IV), (D)-(II)
- (2) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)
- (3) (A)-(III), (B)-(I), (C)-(IV), (D)-(II)
- (4) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)

Q42. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A): The principle pathological abnormality in Klinefelter syndrome is dysgenesis of the seminiferous tubules.

Reasons (R) : This is evident from adulthood and progress with age. By adolescence, hyalinization and fibrosis are present within seminiferous tubules and Leydig cell function is impaired, resulting in hypogonadism. In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are true but (R) is NOT the correct explanation of (A)
- (3) (A) is true but (R) is false
- (4) (A) is false but (R) is true

Q43. Which of the following diameters of fetal skull does not measure 9.5 cm?

- (1) Occipito fronta
- (2) Sub occipito bregmatic
- (3) Sub mento bregmatic
- (4) Biparietal diameter

Q44. Nerve supply of gluteus maximus muscle is :

- (1) Superior Gluteal Nerve
- (2) Inferior Gluteal Nerve
- (3) Obturator Nerve
- (4) Femoral Nerve

Q45. Which of the following test is not suggested for ovulation?

- 1) Endometrial biopsy
- 2) Spinnbarkeit
- 3) Karyopyknotic index of exfoliated vaginal epithelium
- 4) Cervical biopsy

Q46. Any drug which in its natural state affects the vital energy to destructive manifestation should be proven only in:

- (1) Chemical form
- (2) Crude form
- (3) Potentiated form
- (4) Physiological dose

Q47. Norplant" a subdermal implant consist of 6 silastic capsules containing :

- (1) Progestogen
- (2) Oestrogen
- (3) Levonorgestrel
- (4) Mifepristone

Q48. Given below are two statements :

Statement I : Uremia and uric acid diathesis, both the rubrics are given in "Sensations and Complaints in General" chapter of BBCR Repertory

Statement II: Glycosuria and milky urine, both the rubrics are given in the chapter 'Micturition' of Therapeutic pocket Book.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both Statement I and Statement II are correct
- (2) Both Statement I and Statement II are incorrect
- (3) Statement I is correct but Statement II is incorrect
- (4) Statement I is incorrect but Statement II is correct

Q49. Lhermitte's symptom is found in :

- (1) Multiple sclerosis
- (2) Amyloidosis
- (3) Anterior horn cell disease
- (4) Parkinsonism

Q50. A man came with a complaint of Boil in Perineum. What will be the arrangement of Rubric in the Kent's Repertory?

- (1) Skin, Eruption, Boils, Perineum
- (2) Skin, Boils, Perineum, Eruption
- (3) Genitalia — Eruption, Boils, perineum
- (4) Rectum — Eruption, Perineum, Boil

Q51. Given below are two statements :

Statement I : Delayed puberty is said to be delayed when breast tissue and/or pubic hairs have not appeared by 12 years

Statement II: Puberty is said to be delayed when menarche appears as late as 16 years.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both Statement I and Statement II are correct
- (2) Both Statement I and Statement II are incorrect
- (3) Statement I is correct but Statement II is incorrect
- (4) Statement I is incorrect but Statement II is correct

Q52. "Asthma worse in open air and sitting up and better by lying down and keeping arms stretched far apart" is a feature of :

- (1) Arsenicum album
- (2) Psorinum
- (3) Carbo Veg
- (4) Medorrhinum

Q53.

Match List I with List II :

List I (Site of Injury)	List II (Part affected)
(A) Blow on lateral convexity of head	(I) Sagittal sinus
(B) Blow over forehead	(II) Middle meningeal artery
(C) Blow over occiput	(III) Anterior ethmoidal artery
(D) Blow on vertex	(IV) Transverse sigmoid sinus

Choose the correct answer from the options given below :

- (1) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)
- (2) (A)-(III), (B)-(II), (C)-(IV), (D)-(I)
- (3) (A)-(III), (B)-(I), (C)-(II), (D)-(IV)
- (4) (A)-(II), (B)-(III), (C)-(IV), (D)-(I)

Q54. Barrett's oesophagus is characterised by :

- (1) Squamous metaplasia
- (2) Columnar metaplasia
- (3) Mesenchymal metaplasia
- (4) Atypical hyperplasia

Q55. A middle aged male presented with sub acute paresthesias in hands and feet, loss of vibration and position sense and a progressive spastic and ataxic weakness. Examination revealed loss of reflexes along with presence of Babinski sign. Investigation revealed presence of macrocytic RBCs and elevated serum homocystine levels. The most likely diagnosis is

- (1) Tabes dorsalis
- (2) Hereditary spastic paraplegia
- (3) Subacute combined degeneration of spinal cord
- (4) Spondylotic myelopathy

Q60. Match List I with List II:

List I (Sign)	List II (Clinical condition)
(A) String sign of Kantor	(I) Achalasia Cardia
(B) Claw sign	(II) Simple bone cyst
(C) Bird's beak appearance	(III) Crohn's Disease
(D) Fallen leaf sign	(IV) Intussusception

Choose the correct answer from the options given below :

(1) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

(2) (A)-(IV), (B)-(I), (C)-(III), (D)-(II)

(3) (A)-(III), (B)-(II), (C)-(I), (D)-(IV)

(4) (A)-(II), (B)-(III), (C)-(IV), (D)-(I)

Q61. "Obstinate constipation for years; rectum seems tied up with strictures; when enema was used, the agony of passage was like labor" is the symptom of :

(1) Sulphur (2) Syphilinum

(3) Nux Vomica (4) Nitric Acid

Q62. Rubric 'Petit Mal' is given in which chapter of Boericke's Repertory of Homoeopathic Materia Medica and Repertory?

(1) Mind (2) Nervous system

(3) Generalities (4) Locomotor system

Q63. In Boger Boenninghausen's Characteristics and repertory, the rubric 'Opisthotonos' is mentioned in which chapter?

(1) Mind

(2) Fever

(3) Sensation and Complaints in general

(4) Lower extremities

---

Q64. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A): Water soluble hormones acts on its target cell through second messenger system.

Reasons (R) : The hormone receptor complex on the cell membrane activates G proteins thereby activating adenylate cyclase and catalyzing conversion of ATP to cAMP which activates protein kinases.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both (A) and (R) are correct and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are correct but (R) is NOT the correct explanation of (A)
- (3) (A) is correct but (R) is not correct
- (4) (A) is not correct but (R) is correct

Q65. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A): | The Badiaga mother substance is prepared under class VII (old method).

Reasons (R) : The Badiaga drug substance is dry insoluble in nature.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both (A) and (R) are correct and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are correct but (R) is NOT the correct explanation of (A)
- (3) (A) is correct but (R) is not correct
- (4) (A) is not correct but (R) is correct

Q66. A pregnancy is called post-term pregnancy which continues for more than days.

- (1) 290
- (2) 270
- (3) 286
- (4) 294

Q67.

Match List I with List II :

List I (Sign)	List II (Disease Association)
(A) Murphy's	(I) Iliopsoas Abscess, Perinephric Abscess
(B) Rovsing's	(II) Acute Cholecystitis
(C) Iliopsoas	(III) Acute Appendicitis
(D) Grey Turner's and Cullen's	(IV) Haemorrhagic pancreatitis, aortic rupture and ruptured ectopic pregnancy

Choose the correct answer from the options given below :

- (1) (A)-(I), (B)-(II), (C)-(IV), (D)-(III)
- (2) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)
- (3) (A)-(IV), (B)-(I), (C)-(III), (D)-(II)
- (4) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)

Q68. Which of the following statements are true for Ankylosing spondylitis?

- (A) Presence of enthesitis in axial joints
- (B) Sacroilitis is an early manifestation
- (C) Rheumatoid factor (RF), is found in majority of patients
- (D) X-ray of lumbar spine reveal squaring of vertebral bodies

Choose the correct answer from the options given below :

- (1) (B), (C) and (D) only
- (2) (A), (B) and (C) only
- (3) (A), (B) and (D) only
- (4) (A), (C) and (D) only

Q69. For gastric lavage the only absolute contraindication is corrosive poisoning except

- (1) Oxalic acid
- (2) Salicylic acid
- (3) Carbolic acid
- (4) Nitric acid

Q70. Who proposed the double blind method of proving of drugs in healthy volunteers?

- (1) Hering                      (2) Albrecht von Haller  
(3) Drysdale                    (4) Jenichen

Q71. Match List I with List II:

List I	List II
(A) Anterior Mediastinum	(I) Azygos Vein
(B) Middle Mediastinum	(II) Pulmonary Trunk
(C) Posterior Mediastinum	(III) Sternopericardial Ligaments
(D) Superior Mediastinum	(IV) Left Brachiocephalic Vein

Choose the correct answer from the options given below :

- (1) (A)-III, (B)-(I), (C)-(II), (D)-(IV)  
(2) (A)-(IV), (B)-(II), (C)-(I), (D)-(III)  
(3) A)-(IV), (B)-(III), C (II), (D)-(I)  
(4) (A)-(III), (B)-(II), (C)-(I), (D)-(IV)

Q72. Which of the following theory is postulated for placenta praevia?

- (1) Implantation theory              (2) Coelomic metaplasia theory  
(3) Metastatic theory                (4) Dropping down theory

Q73. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A): Adrenogenital syndrome is a cause for female pseudo hermaphroditism.

Reasons (R) : It is inherited as X-linked recessive gene which causes diminished response to androgens

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both (A) and (R) are correct and (R) is the correct explanation of (A)  
(2) Both (A) and (R) are correct but (R) is NOT the correct explanation of (A)

(3) (A) is correct but (R) is not correct

(4) (A) is not correct but (R) is correct

Q74. Place the given stages of phagocytosis in the correct order of occurrence.

(A) Formation of Phagolysosome

(B) Adherence to Microbe

(C) Destruction of Microbe

(D) Ingestion to form a phagosome

(E) Chemotactic attraction of phagocyte

Choose the most appropriate answer from the options given below :

(1) (E), (D), (B), (C) and (A) only

(2) (E), (B), (D), (A) and (C) only

(3) (B), (E), (D), (A) and (C) only

(4) (B), (E), (A), (D) and (C) only

Q75. Choose the correct option with respect to persons with light hair and skin; irritable, quarrelsome disposition; easily offended at trifles; vexed at everything. Skin of hands rough, cracked; tips of fingers rough, cracked, fissured, every winter; tenderness of the feet which are bathed in foul-smelling sweat.

(1) Silicea (2) Petroleum (3) Graphites (4) Sanicula

Q76. Which of the following is not a symptom of Benzoic acid?

(1) Highly colored urine (2) Ganglion of wrist

(3) Offensive urine of old men (4) Cough worse on lying on left side

Q77. The main toxic metabolite of alcohol which is responsible for alcohol related injury to different organs is :

(1) Formaldehyde (2) Cysteamine

(3) Acetaldehyde (4) Malondialdehyde

Q78. All are factors of Ranson Scoring on admission except :

- (1) Serum urea > 16 mmol/L
- (2) White blood cell count >  $16 \times 10^9/L$
- (3) Blood glucose > 1.1 mmol/L (> 200 mg/dl)
- (4) Age > 55 years

Q79. During trituration, HP! divided the sugar of milk in which ratio in decimal scale?

- (1) 3:3:3
- (2) 33:33:33
- (3) 11:33:55
- (4) 1:3:5

Q80. The Rubric 'Convulsions with Consciousness' is mentioned in which of the following chapter of Therapeutic Pocket Book?

- (1) External head
- (2) Aggravations
- (3) Internal head
- (4) Sensations

Q81. Given below are two statements :

Statement I : Carcinisin is indicated in post operative gas pains, no relief from passing it.

Statement II: Children have great fear, are sensitive to reprimands but sympathetic to others is a characteristic feature of Carcinisin.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both Statement I and Statement II are correct
- (2) Both Statement I and Statement II are incorrect
- (3) Statement I is correct but Statement II is incorrect
- (4) Statement I is incorrect but Statement II is correct

Q82. The only remedy mentioned in Boenninghausen's Therapeutic Pocket book in 'Aggravations from spices' is :

- (1) Sulphur
- (2) Nux Vomica
- (3) Phosphorus
- (4) Sepia

Q83. Given below are two statements :

Statement I : The classic triad of congenital defects in “Congenital Rubella Syndrome” are deafness, cardiac malformations and cataracts.

Statement II: The Rubella vaccine should be given to every pregnant woman during early pregnancy.

In the light of the above statements, choose the correct answer from the options given below:

- (1) Both Statement I and Statement II are true
- (2) Both Statement I and Statement II are false
- (3) Statement I is true but Statement II is false
- (4) Statement I is false but Statement II is true

Q84. Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A): — Digitonin of Digitalis is an example of saponin with distinctive property of frothing.

Reasons (R) : Saponin are plant glycosides and they are non-crystalline and dissolve in water with colloidal solutions.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are true but (R) is NOT the correct explanation of (A)
- (3) (A) is true but (R) is false
- (4) (A) is false but (R) is true

Q85. Which are the non-articular manifestations of rheumatoid arthritis?

- (A) Pericarditis
- (B) Sjogren’s syndrome
- (C) Cervical myelopathy
- (D) Z-deformity

Choose the correct answer from the options given below :

(1) A), (B), (D) only

(2) A), (B), (C) only

(3) (B) and (A) only

(4) (B), (C), (D) only

Q86. In a prescription, directions to the patient are given under :

(1) Superscription

(2) Inscription

(3) Subscription

(4) Signature

Q87. Given below are two statements :

Statement I : Hydrogen Sulphide interfere with cellular respiration by inhibiting the action of cytochrome oxidase.

Statement II: In Hydrogen Sulphide poisoning post mortem staining is of cherry red colour.

In the light of the above statements, choose the most appropriate answer from the options given below :

(1) Both Statement I and Statement II are correct

(2) Both Statement I and Statement II are incorrect

(3) Statement I is correct but Statement II is incorrect

(4) Statement I is incorrect but Statement II is correct

Q88. Pseudogout arthritis is caused by :

(1) Monosodium urate

(2) Calcium pyrophosphate

(3) Calcium apatite

(4) Calcium oxalate

Q89. Arrange the following concepts in the chronological order of their appearance in the aphorisms of sixth edition of Organon of Medicine, starting from lowest to highest.

(A) Preserver of health

(B) Highest ideal of cure

---

(C) Fundamental cause

(D) Portrait of the disease

Choose the correct answer from the options given below :

(1) B,D,C,A

(2) D,A,C,B

(3) C,B,D,A

(4) B,A,C,D

Q90. Given below are two statements :

Statement I : Rapid change of symptoms — pain changes in regard to place and character is a feature of Berberis Vulgaris.

Statement II: Berberis vulg. is indicated in complaints of drunkards after abstaining.

In the light of the above statements, choose the correct answer from the options given below :

(1) Both Statement I and Statement II are true

(2) Both Statement I and Statement II are false

(3) Statement I is true but Statement II is false

(4) Statement I is false but Statement II is true

Q91.

Match List I with List II :

List I	List II
Rubric	Chapter/Section in Boenninghausen's Therapeutic Pocket Book
(A) Hair of head falls out	(I) Intellect
(B) Amativeness	(II) Sensation
(C) Chlorosis	(III) Mind
(D) Vertigo	(IV) Skin

Choose the correct answer from the options given below :

- (1) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)
- (2) (A)-(IV), (B)-(III), (C)-(II), (D)-(I)
- (3) (A)-(II), (B)-(I), (C)-(IV), (D)-(III)
- (4) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)

Q92. Sore throats and cough apt to begin and end with menstruation is a keynote features of :

- (1) Bovista
- (2) Lachesis
- (3) Pulsatilla
- (4) Lac. Can

Q93. The term "Tolle Causam" means :

1. Removal of the cause of disease
2. Totality of symptoms
3. Moral remedy
4. Palliation of the effects of physiological doses

Q94. According to Hahnemann, which method of medicine administration was employed by Mongrel sect?

- (1) Quid quid in buccam venit
- (2) Aude sapere
- (3) Duce natura
- (4) Infinitesimal dose

---

Q95. Glasgow Coma Scale (GCS) score is an assessment of :

- (1) conscious level of patient                      (2) severity of acute appendicitis  
(3) schizophrenia patient                              (4) pupillary response to light stimulus

Q96. Which of the following investigations will help to differentiate esophageal achalasia from benign mechanical strictures of esophagogastric junction?

- (1) Chest X-ray    (2) Barium swallow  
(3) Endoscopy    (4) Manometry

Q97. Which among the following medicine does not belong to Compositae family?

- (1) Arnica montana                                      (2) Bellis perennis  
(3) Ledum palustre                                        (4) Millifolium

Q98. The 9<sup>th</sup> target of sustainable development goal 2030 is :

1. Strengthen the implementation of the World Health Organization framework convention on Tobacco control in all countries as appropriate
2. Strengthen the capacity of all countries, in particular developing countries, for early warning, risk reduction and management of national and global health risks
3. By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination
4. By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and mental health and well-being.

Q99.

Find the correct sequence :

- (A) River Water
- (B) Flocculation Chamber
- (C) Sedimentation Tank
- (D) Filters
- (E) Clear water storage

Choose the correct answer from the options given below :

- (1) River water → Clear water storage → Filters → Sedimentation Tank → Flocculation Chamber
- (2) Clear water storage → Filters → Flocculation Chamber → Sedimentation Tank → River water
- (3) River water → Flocculation Chamber → Filters → Clear water storage → Sedimentation Tank
- (4) River water → Flocculation Chamber → Sedimentation Tank → Filters → Clear water storage

Q100. Fern tree pattern is present in which phase of menstrual cycle?

- (1) Secretory phase
- (2) Follicular phase
- (3) Ovulatory phase
- (4) Regenerative phase

Q101. Enzyme secreted by the kidneys that is involved in the control of blood pressure is :

- (1) Erythropoietin
- (2) Angiotensin
- (3) Aldosterone
- (4) Renin

Q102. Given below are two statements :

Statement I : Respiratory Acidosis is caused by retention of carbon dioxide. The PaCO<sub>2</sub> and H<sup>+</sup> rise.

Statement II: In Respiratory alkalosis there is the fall in PaCO<sub>2</sub> and H<sup>+</sup>.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both Statement I and Statement II are correct
- (2) Both Statement I and Statement II are incorrect

---

(3) Statement I is correct but Statement II is incorrect

(4) Statement I is incorrect but Statement II is correct

Q103. Match List I with List II:

List I (Rubric)

List II (Chapter in Kent's Repertory)

(A) Chordee

(I) Nose

(B) Hordeola

(II) External throat

(C) Hay Fever

(III) Eye

(D) Torticollis

(IV) Urethra

Choose the correct answer from the options given below :

(1) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

(2) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)

(3) (A)-(III), (B)-(I), (C)-(II), (D)-(IV)

**(4) (A)-(IV), (B)-(III), (C)-(I), (D)-(II)**

Q104. Who amongst the following was the first English translator of fourth edition of Organon of Medicine?

(1) R.E. Dudgeon

(2) CE. Wheeler

(3) C. Wesselhoeft

**(4) Charles H. Devrient**

Q105. Given below are two statements :

Statement I : Melanoma is a cancer of melanocytes and can, therefore, arise only in skin.

Statement II: Breslow thickness of a melanoma is the most important prognostic indicator in the absence of lymph node metastases.

In the light of the above statements, choose the correct answer from the options given below :

(1) Both Statement I and Statement II are true

(2) Both Statement I and Statement II are false

(3) Statement I is true but Statement II is false

**(4) Statement I is false but Statement II is true**

Q106. Given below are two statements :

Statement I : American Homoeopathic Pharmacopoeia, in its earlier editions, divided all vegetables and animal drug substance into four classes for preparation of mother tincture.

Statement II: The amount drug substance was 1/2, 1/3, 1/6 and 1/10 in each of the respective classes.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both Statement I and Statement II are true
- (2) Both Statement I and Statement II are false
- (3) Statement I is true but Statement II is false
- (4) Statement I is false but Statement II is true

Q107.

Match List I with List II :

List I	List II
(A) §23	(I) Typical Intermittent diseases
(B) §26	(II) Antipathic method
(C) §73	(III) Homeopathic law of nature
(D) §233	(IV) Acute miasms

Choose the correct answer from the options given below :

- (1) (A)-(II), (B)-(III), (C)-(IV), (D)-(I)
- (2) (A)-(I), (B)-(IV), (C)-(II), (D)-(III)
- (3) (A)-(IV), (B)-(III), (C)-(I), (D)-(II)
- (4) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)

Q108.

Match List I with List II with corresponding given single medicine in Kents Repertory

List I Rubric	List II Medicine in Kents Repertory
(A) Squanders money	(I) Syphilinum
(B) Benevolence	(II) Verat alb.
(C) Washing always her hands	(III) Lycopodium
(D) Power, love of	(IV) Coffea

Choose the correct answer from the options given below :

- (1) (A)-(II), (B)-(IV), (C)-(I), (D)-(III)
- (2) (A)-(II), (B)-(I), (C)-(IV), (D)-(III)
- (3) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)
- (4) (A)-(III), (B)-(II), (C)-(IV), (D)-(I)

Q109.

Match List I with List II :

List I Rubric	List II Chapter in Kent's Repertory
(A) Pulse	(I) Mind
(B) Whistling	(II) Extremities
(C) Mania a Potu	(III) Generalities
(D) Contraction of muscles and tendons	(IV) Larynx and Trachea

Choose the correct answer from the options given below :

- (1) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
- (2) (A)-(I), (B)-(III), (C)-(IV), (D)-(II)
- (3) (A)-(IV), (B)-(III), (C)-(I), (D)-(II)
- (4) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)

Q110.

Match List I with List II :

List I (Common name of the remedy)	List II (Latin name of the remedy)
(A) Baneberry	(I) <i>Berberis vulgaris</i>
(B) Barberry	(II) <i>Apocynum cannabinum</i>
(C) Indian hemp	(III) <i>Acalpha indica</i>
(D) Indian nettle	(IV) <i>Actea spicata</i>

Choose the correct answer from the options given below :

- (1) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
- (2) (A)-(IV), (B)-(III), (C)-(I), (D)-(II)
- (3) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)
- (4) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)

Q111. Which of the following statements are true for multiple endocrine neoplasia (MEN) syndromes?

- (A) Each type of MEN syndrome is inherited as autosomal recessive.
- (B) MEN type 1 is characterized by triad of tumors involving parathyroids, pancreatic islets and anterior pituitary
- (C) Majority of patients with MEN type 1 have hypercalcemia
- (D) Medullary thyroid carcinoma is the most common feature of MEN type 2

Choose the correct answer from the options given below :

- (1) (A), (B) and (C) only
- (2) (A), (C) and (D) only
- (3) (B), (C) and (D) only
- (4) (A), (B) and (D) only

Q112.

Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A) : Behaviour Change Communication (BCC) is a key supportive strategy for malaria prevention and treatment under NVBDCP (National Vector Borne Disease Control Programme)

Reasons (R) : People should be motivated to remain polite, earn more and spend a lot on medicines to keep themselves healthy.

In the light of the above statements, choose the most appropriate answer from the options given below :

- (1) Both (A) and (R) are correct and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are correct but (R) is NOT the correct explanation of (A)
- (3) (A) is correct but (R) is not correct
- (4) (A) is not correct but (R) is correct

Q113. Which of the following is the spurt muscle?

- (1) Brachioradialis
- (2) Brachialis
- (3) Pronator Teres
- (4) Coracobrachialis

Q114. First homoeopathic journal was published by :

- (1) Boenninghausen
- (2) Richard Hughes
- (3) Stapf
- (4) Dunham

Q115. Which of the following statements are correct about Epstein Barr Virus (EBV) infections.

- (A) It is the cause of heterophile — positive infectious mononucleosis.
- (B) EBV spreads by contact with oral secretions.
- (C) Humoral immunity is more important than cellular immunity in controlling EBV infections.
- (D) Most EBV infection in infants and young children are either asymptomatic or mild.

Choose the correct answer from the options given below :

- 
- (1) A,B, C only  
(2) A, C, D, only  
**(3) A,B, D only**  
(4) C, D only

Q116. Which of the following statements are correct about malignant tumor cells?

- (A) Most malignant tumor cells show DNA aneuploidy  
(B) The N : C ratio is decreased from 1:1 to 1:5  
(C) Nuclear chromatin is increased and coarsely clumped  
(D) Malignant cells have prominent nucleoli in the nucleus.

Choose the correct answer from the options given below :

- (1) (A), (B) and (C) are correct  
(2) (B), (C) and (D) are correct  
(3) (A), (B) and (D) are correct  
**(4) (A), (C) and (D) are correct**

Q117. Struvite stones are formed in kidneys as a result of which of the following?

- (1) Urinary tract infection**                      (2) Gout  
(3) Hereditary xanthinuria                      (4) Hypercalcaemia

Q118. In preface of which edition of Organon, Hahnemann used the term 'a priori' while referring to Theoretical Medicine?

- (1) First edition                                      **(2) Second edition**  
(3) Third edition                                      (4) Fourth edition

Q119. Given below are two statements :

Statement I : The wound will have bevelled margin, if the blade of weapon enters obliquely.

Statement II: Bevelling can be produced by sharp weapons only.

In the light of the above statements, choose the correct answer from the options given below:

---

(1) Both Statement I and Statement II are true

(2) Both Statement I and Statement II are false

(3) Statement I is true but Statement II is false

(4) Statement I is false but Statement II is true

Q120. Match List I with List II:

List I

List II

(A) < 10 years

(I) Multiple Myeloma

(B) Teenage

(II) Eosinophilic granuloma

(C) Reproductive age

(III) Ewing's Sarcoma

(D) > 60 years

(IV) Breast cancer

Choose the correct answer from the options given below :

(1) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)

(2) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)

(3) (A)-(IV), (B)-(II), (C)-(III), (D)-(I)

(4) (A)-(II), (B)-(III), (C)-(IV), (D)-(I)
