**Subject:** Guidelines about Investigations of Covid-19

Respected Sir,

For the last few weeks we came across a few incidents where we found that most of the Pathology labs in Delhi have refused to do the required investigations for COVID-19 of patients if prescribed by AYUSH doctors. They stated that in accordance with ICMR guidelines they need a prescription from a MBBS doctor only.

1. Is it true?
2. What we will advise if we are facing the patients with similar symptoms of COVID-19?
3. What are the guidelines issued for AYUSH doctors because we got information that we can treat mild cases with similar symptoms but as investigation is an integral part to differentiate from other viral diseases, how to proceed further because the labs are denying to do so.

Kind issue the guidelines for AYUSH doctors for the investigations and treatment regarding COVID-19.

**Thank you**

**Dr Deepak Sharma**

Gen. Secretary DHMA

However it is latest and refined method of treating the patient economically and non violently Govt. must encourage and patronize it in our country (Mahatma Gandhi).

Will never fail but the followers may fail owing its faulty application of the principles, public rightly can tell you about efficiency

and energy in the matter with special stress upon the Indian environment (Rawbindranath Tagore). Just as my non violence will never fail so also Homoeopathic treatment
