To,

**Deputy Commissioner**

Mangaluru

Dakshina Kannada

Respected Madam,

Considering the current outbreak of covid19 in the country and unprecedented situation prevailing thereafter we as Homoeopaths feel it's our moral duty to draw your kind attention to the following facts to combat the situation successfully.

As there is neither definite treatment protocol nor any vaccine to counter the Corona 19 outbreaks, prevention has remained the mainstay of strategies adopted worldwide.

Homoeopathy being a science of therapeutics founded by Dr Samuel Hahnemann an allopathic practitioner of his time in Germany has shown repeatedly to the world successfully combating epidemics through homoeopathic intervention from time to time. Homoeopathic Medical science has adopted a unique concept of Genus epidemicus, a medicine which is useful both as preventive/ immune-booster as well as curative in epidemics. Genus epidemicus is arrived at

after studying the symptomatology of the epidemic is in question. This would help in improving immunity level of population when given. Thus acting as preventive to the Epidemics.

Homeo immune booster therapy is effective, safe, economic, easily acceptable and usable by the mass. It can be distributed a very short span of time to large population thus relieving stress on health apparatus of the country.

Homeopathy having great history of prevention of many epidemics since 220 years, why not in corona? Let us substantiate success of Homoeopathy in the world as preventive/ immune-booster as well as curative mode of therapy in various epidemics. The preventive aspect of Homoeopathy is well known for prevention during the epidemics of Cholera, Dengue, H1N1, Spanish Influenza, Yellow fever, Scarlet fever, Diphtheria, Typhoid etc

1. Cuban govt successfully employed Homoeopathy prophylaxis in Leptospirosis (2007-08).It has also employed Homoeopathy in COVID-19.

2. A double blind study conducted in Brazilian public health system in Petropolis to prevent influenza and acute respiratory infection in children.

3. Japanese Encephalitis of Andhra Pradesh and Kerala successfully employed Homoeopathic medicines

Belladonna, Calcarea and Tuberculinum (BCT Project) not only in Homoeopathic dispensaries and also in Govt. allopathic hospitals.

4. Chikun gunya of South India especially Karnataka and Kerala was successfully prevented and treated by Homoeopathic medicine.

5. AYUSH ministry has released a circular stating that Ars Alb 30 is the medicine which could be distributed as immune-booster. (Kerala, being 1<sup>st</sup> state in country to get COVID-19 positive, tackled spreading of infection tremendously by improving immunity by providing Homoeopathic Prophylaxis **Ars Alb 30**).

Following that many states like Gujarat, Telangana, Pune (Esp for the Police officials) has dispensed Homeopathic immune Boosters with good outcome.

Hence we request your good self to consider our request and implement homeopathic Immune Booster at the earliest in D.K. Allow Homoeopathic immune-booster distribution to the public (Along with ASHA workers, Police Officials, Covid Warriors, Volunteers who are more prone to Infection) by all homeopathic Dispensaries including Government & Private along with Homeopathic medical colleges of D.K.

Thanking you
