

Whenever I work with vaccine injured children, and see what a tragedy it is that these children and their families have to suffer so much, I am continually asking myself – WHY – why won't the medical people acknowledge and correct what is happening here?

This is also a question many parents ask me: If we have all this information, WHY do the health authorities still allow such dreadful injury to occur?

WHY?

The answer will reveal the failings of generations of men and women, whom we trusted to care for us and for our children. There is no nice way to say this, and history will judge accordingly.
