

Bio – Chemis System Of Medicine:-

BY :- DR. SHREYA JOSHI

DEFINATION

Bio-chemic system of medicine may be defined as , the branch of therapeutics based on the **LAW OF DEFICIENCY** , i.e. the deficiency of inorganic salts which cause disequilibrium in the harmonious functioning of the organic constituents of the cell , so it must be corrected by supplying the requisite proportion of the inorganic salt.

FOUNDER :-

**Dr. Wilhelm Heinrich
Schuessler , in 1873.**

Virchow's Cellular Pathology:-

- Dr. Schuessler was greatly influenced by R. Virchow, the founder of cellular pathology.
- According to Virchow, ‘ The nature of the disease is the disease of the cells.’
- Schuessler agreed with Virchow that the basic cause of all life processes and the changes in organs and tissues was to be found in the sensitivity of the cells.
- Dr. Schuessler, on gaining inspiration from articles, formulated a new system of therapeutics. In March 1873 he published his articles ‘ An abridged homoeopathic Therapeutics.’

- Dr. schuessler , after 15 years of homoeopathic practice , became particularly interested in the important inorganic salts of which the human body is composed of , and in their quantitative relations.
- 1873 is considered the birth year of biochemistry.
- In 1874 schuessler's 1st work appeared. It's tittle was '*an abridged therapy on the basis of physiology and cellular pathology*'.
- The inorganic substances found in blood and tissues are sufficient to cure all diseases and in particular they help to regulate constitutional disturbances.

BIOCHEMIC Vs HOMOEOPATHY :-

BIOCHEMIC	HOMOEOPATHY
This system was discovered by Dr. schussler in 1873.	This system was discovered by Dr. Hahnemann in 1790.
Based on : LAW OF DEFICIENCY.	Based on : LAW OF SIMILIA SIMILIBUS CURANTUR.
Number of drugs in biochemic are only 12.	Number of drugs in homoeopathy is more than 4500.
All medicines are prepared from mineral kingdom only.	Medicines are prepared from different kingdom.
Drugs are prepared only in decimal scale.	Drugs are prepared in all the three scales.

BIOCHEMIC

HOMOEOPATHY

Polypharmacy is allowed.

Only monopharmacy is allowed.

Frequent repetition is allowed

Only single dose is allowed.

Doses are minute and have physiological action.

Doses are minute and act by dynamic way.

Susceptibility is not considered.

Susceptibility is considered.

Concept of diathesis , temperament and miasm are not considered.

Concept of diathesis , temperament and miasm are considered.

Medicine acts through circulatory and digestive system.

Medicine acts through nervous system.

It is dispensed in tabloid and powder form.

It is dispensed in mother tincture and globules form.

Biochemic
Cell Salts

Minerals for health
and more vitality

Bio chemic salt	Found in	Deficiency of salt producing diseases condition
1. Calc. fluorica	Enamel of teeth , bones , elastic tissue & strengthen the blood vessels.	Varicose vein , bone & tooth disease , rickets , hardness of glands and nodular extra growth of fibrous tissue.
2. Calc. phosphorus	Most abundant salt in the body as compared to the other salts. It form hard bone , and involved in formation of protein	Teeth diseases, nails diseases, bone fracture, nervous disorders
3. Ferr. phosphorus	Main constituent of haemoglobin , found in all cells ,is also involved in many enzymatic process , connective tissue.	Indicated in early (1 st stage) of inflammation and fever, anaemic condition, haemorrhages , and circulatory disturbances.
4. Calc. sulphur	In liver and gall bladder, increases blood coagulation and stimulates metabolism.	Suppuration in tissues , inflammation of tissues , boils , abscess with foul smelling discharges.

<p>5. Kali. mur</p>	<p>Every cells ,RBC , affect sensitivity of nerve & muscles.</p>	<p>Catarrhal condition of various organs and mucus membrane ,helps in 2nd stage of inflammation , it produces whitish grey formation of mucus membrane.</p>
<p>6. Kali. phosphorus</p>	<p>Imp. For brain , nerve and muscles cells and blood plasma , spinal cord.</p>	<p>Nervous exhaustion , depression , poor memory and mental activity, anxiety ,hysteria, and sadness. Sleep disorder.</p>
<p>7. Kali. sulphur</p>	<p>Found in epidermis and epithelial cells , helps in cellular metabolism.</p>	<p>Helps in 3rd stage of inflammation, chronic suppuration of mucus membrane and catarrhal condition of nose , ear ,throat and kidney.</p>
<p>8. Mag. phosphorus</p>	<p>Bone , muscular system , nerve and spinal cord.</p>	<p>All types of pain and colic except burning pain. Produce constriction in affected part.</p>

9. Nat. mur	Common salt , regulates the water balance & osmotic balance.	Anemia , chlorosis , weight loss , emaciation , general physical and mental weakness.
10. Nat. phosphorus	Brain cells , blood corpuscles , connective tissue.	Metabolic disorder , acidity , liver, gout.
11. Nat. sulphur	Found in cells	Liver, gall bladder, skin diseases, extra growth of tissue.
12. silicea	Skin, hair , nail , bones , helps in increase the power of resistance and lymph function.	Stimulates the phagocytic activities , suppuration of tissue and skin. Undernourishment. Effusion of tissue. Falling of hair. Nail diseases.

CONCLUSION :-

- The biochemic medicine restores the ion gradient necessary for the normal functioning of the cells.
- Dr. schussler suggested that biochemistry rectifies disease directly , by administration of homogeneous substances , while homoeopathy does so indirectly , by administration of hetrogeneous substances.
- Biochemisty works on sound and valid principles.
- Thus the two system can be said to be siblings under the skin.

Thank You
